

Town of Newington

Incorporated 1871 - Connecticut

Electronic Recycling Program

Newington's Electronic Recycling Program is a new addition to the town's landfill area, on Main Street, just South of Churchill Park. It is open strictly to town residents, and follows the same regulations and service times as the landfill. Upon entering the facility you will be directed to your immediate left where a large green recycling container stands. The container is locked and all equipment should be left outside the container.

The town is not responsible for data security regarding any data-holding electronic equipment. Should you require fully secured data removal and recycling, you should drop off your equipment directly to The Computer Recycler. Go to www.thecomputerrecycler.com for drop off details and more information.
